Dedicated and industrious individual, committed to continuous growth and learning. Eagerly seeking an internship opportunity to apply my skills in a stimulating and challenging environment. With a background in Computer Science Engineering and proficiency in Data Structures and Algorithms (DSA) and Web Development, I aim to further enhance my abilities through the knowledge and experiences gained during this internship. Recognized for sincerity, diligence, and a strong work ethic, I am poised to contribute effectively to any team or project while sharpening my skills for future endeavors.

WORK EXPERIENCE

- ❖ **Summer Intern at Technophelia.inc**   **Jan 2024 – Feb 2024**
- ❖ Demonstrated comprehension of **Web development with HTML/CSS** became my foundational tools, allowing me to shape digital landscapes and craft immersive online experiences. Through these training, I honed my skills, each endeavor contributing to my growth as a developer, focusing on different projects, enhancing overall production efficiency.
- ❖ **INTERNSHIP OFFER LETTER FROM CODSOFT**   **20 Feb – 20 March**

structured experience demonstrates the practical skills and responsibilities undertaken during the web development internship, showcasing a proactive approach to learning and contributing to real-world projects
in codsoft. Here the primary focus is on learning and developing new skills and gaining hands-on knowledge.

PROJECTS

- ❖ **JavaScript Calculator Project**

This JavaScript calculator project is an ideal way to demonstrate our skills in web development. It covers HTML for structure, CSS for styling, and JavaScript for functionality, it providing a comprehensive example of our coding abilities.

- ❖ **Portfolio Project of Web Development**

This project demonstrates proficiency in HTML, CSS, and JavaScript. This project involves building a responsive and interactive website that highlights your work, skills, and contact information.

- ❖ **Java Electricity Billing System**

An Electricity Billing System is a software application or a process designed to calculate, generate, and manage electricity bills for consumers. It is used by utility companies to automate billing operations and ensure accurate charges based on electricity usage.

- ❖ **Java Employee Management System**

Creating a Java Employee Management System involves building an application that can manage employee data such as names, IDs, departments, salaries, and more. Here's a simple outline for such a system:

EDUCATION

- ❖ **Babu Banarasi Das University**   **Aug 2021 - June 2025**
- • Bachelor of technology in computer science & Engineering
- • C.G.P.A: 7.8
- ❖ **Progressive Children Public Senior Secondary School (12th) May 2019- May 2021**
- • Percentage: 93.02%
- ❖ **Dr. Bansi Dhar School (10th)**   **May 2017 – May 2019**
- • Percentage: 85.43%

SKILLS

- • **Language:** C, JavaScript
- • **Web Development:** HTML, CSS,
- • **Competitive Programming:** Data - Structures and Algorithms
- • Microsoft Office
- • **Communication Skills:** English, Hindi

EXTRA – CURRICULAR

- • Participating in Process of Innovation Development and Technology Readiness Development.
- • Participating in Artificial Intelligence with Python under **Coincent .**
